

Dear Sirs:

Please reject the NAB Petition 04-160 as I am a happy subscriber to XM radio and need to receive up to date and accurate weather and traffic information. I do not need all the commercials on the regular stations and love XM. I can understand why the other broadcasters want to destroy XM as it is taking away their bread and butter, but the last I knew this is America where we believe in free enterprise and freedom of speech.

Thank you for your time and any effort you can make to keep Satellite radio the growing, helpful entity that it is. We love it!

Linda Miller
